

Icethaw Salt Spreaders

1950 Pedestrian Push-a-long Spreader

Description

The 1950 is a real performer for the small area homeowner. Fully assembled, the 1950 goes from the box to the yard in seconds. Unlike other small spreaders, the 1950 utilizes the EV-N-SPRED[®] 3-hole drop to ensure even spreading of all materials. With its 8"/20cm deep lug poly wheels, and its 25lb/12kg rust-proof poly hopper, the 1950 is a true performer.

Recommended for use with either a fine grade or coarse grade de-icer, it is effective at de-icing paths and walkways.

77007 Heavy-Duty Rain Cover

Heavy-duty raincover for 1950 & 3200 models.
